

## Investment priorities in the mining sector

Row	Project Title	Proposed Location of Implementation	Related Potential / Advantage
1	Creation of units such as full recycle of heavy metals from wastes of Zinc, ferroalloy, carboniums (raw material and final product)	Provincial Industrial Parks	- Availability of raw materials - Demand of domestic manufacturing units
2	Industries for the processing of minerals, such as, silica, feldspat, plaster, lime and decorative stones	Provincial Industrial Parks	- Availability of quality raw materials in the Province - Creating high-added value
3	Processing of decorative and building stones, using current technologies	Provincial Industrial Parks	- Availability of quality raw materials in the Province - Demand of domestic manufacturing units
4	Construction of magnesium processing unit by putting dolomite mines in the Province into operation	Provincial Industrial Parks	- Availability of raw materials in the Province - Creating high-added value
5	Establishment of industries related to the processing of some minerals	Provincial Industrial Parks	- Production of raw material industry for upstream industries in the Province - Reduction of the external costs, such as, transport and...
6	Exportation of decorative stones	Mineral zones of the province	- Availability of quality raw materials in the Province - Creating higher-added value for competitiveness
7	Complementary and detailed exploration of mining areas and the creation of downstream industries to supplement the processing chains	Mineral zones of the province	- Potentials for investment in the mineral exploration sector - Creating high-added value
8	Exploration of copper and polymetal, phosphate, nickel, raw material for aluminum production	Mineral zones of the province	- Potentials for investment in the mineral exploration sector

9	Mineral exploration of lead, zinc, iron ore and gold	Mineral zones of the province	<ul style="list-style-type: none"><li>- Potentials for investment in the mineral exploration sector</li><li>- Demand of domestic manufacturing units</li></ul>
10	Exploitation of iron ore mines	Mineral zones of the province	<ul style="list-style-type: none"><li>- Potentials for investment in the mineral sector</li><li>- Creating high-added value</li></ul>
